19950919 306

GRANT NO: DAMD17-94-J-4197

TITLE: INTERNATIONAL SYMPOSIUM: AUDITORY AND REGENERATION: SCIENTIFIC AND CLINICAL IMPLICATIONS

PRINCIPAL INVESTIGATOR(S): DONALD HENDERSON

CONTRACTING ORGANIZATION: STATE UNIVERSITY OF NEW YORK

AMHERST, NEW YORK 14228-2567

REPORT DATE: AUGUST 1995

TYPE OF REPORT: FINAL - PROCEEDINGS

PREPARED FOR:

Commander

U.S. Army Medical Research and Materiel Command

Fort Detrick, Maryland 21702-5012

DISTRIBUTION STATEMENT: Approved for public release;

distribution unlimited

The views, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy or decision unless so designated by other documentation.

GENERAL INSTRUCTIONS FOR COMPLETING SF 298

The Report Documentation Page (RDP) is used in announcing and cataloging reports. It is important that this information be consistent with the rest of the report, particularly the cover and title page. Instructions for filling in each block of the form follow. It is important to stay within the lines to meet optical scanning requirements.

- Block 1. Agency Use Only (Leave blank).
- **Block 2.** Report Date. Full publication date including day, month, and year, if available (e.g. 1 Jan 88). Must cite at least the year.
- Block 3. Type of Report and Dates Covered. State whether report is interim, final, etc. If applicable, enter inclusive report dates (e.g. 10 Jun 87 30 Jun 88).
- Block 4. <u>Title and Subtitle</u>. A title is taken from the part of the report that provides the most meaningful and complete information. When a report is prepared in more than one volume, repeat the primary title, add volume number, and include subtitle for the specific volume. On classified documents enter the title classification in parentheses.
- **Block 5.** <u>Funding Numbers</u>. To include contract and grant numbers; may include program element number(s), project number(s), task number(s), and work unit number(s). Use the following labels:

C - Contract G - Grant PR - Project TA - Task

PE - Program Element WU - Work Unit Accession No.

- **Block 6.** <u>Author(s)</u>. Name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. If editor or compiler, this should follow the name(s).
- **Block 7.** <u>Performing Organization Name(s) and Address(es)</u>. Self-explanatory.
- Block 8. Performing Organization Report Number. Enter the unique alphanumeric report number(s) assigned by the organization performing the report.
- **Block 9.** Sponsoring/Monitoring Agency Name(s) and Address(es). Self-explanatory.
- **Block 10.** Sponsoring/Monitoring Agency Report Number. (If known)
- Block 11. Supplementary Notes. Enter information not included elsewhere such as: Prepared in cooperation with...; Trans. of...; To be published in.... When a report is revised, include a statement whether the new report supersedes or supplements the older report.

Block 12a. <u>Distribution/Availability Statement</u>. Denotes public availability or limitations. Cite any availability to the public. Enter additional limitations or special markings in all capitals (e.g. NOFORN, REL, ITAR).

DOD - See DoDD 5230.24, "Distribution Statements on Technical Documents."

DOE - See authorities.

NASA - See Handbook NHB 2200.2.

NTIS - Leave blank.

Block 12b. Distribution Code.

DOD - Leave blank.

 For the Standard Distribution for Unclassified Scientific and Technical Reports.

NASA - Leave blank. NTIS - Leave blank.

- **Block 13.** Abstract. Include a brief (Maximum 200 words) factual summary of the most significant information contained in the report.
- **Block 14.** Subject Terms. Keywords or phrases identifying major subjects in the report.
- **Block 15.** <u>Number of Pages</u>. Enter the total number of pages.
- **Block 16.** <u>Price Code</u>. Enter appropriate price code (NTIS only).
- Blocks 17. 19. Security Classifications. Self-explanatory. Enter U.S. Security Classification in accordance with U.S. Security Regulations (i.e., UNCLASSIFIED). If form contains classified information, stamp classification on the top and bottom of the page.
- Block 20. <u>Limitation of Abstract</u>. This block must be completed to assign a limitation to the abstract. Enter either UL (unlimited) or SAR (same as report). An entry in this block is necessary if the abstract is to be limited. If blank, the abstract is assumed to be unlimited.

FINAL REPORT (DAMD17-94-J-4197)

SYMPOSIUM: AUDITORY PLASTICITY AND REGENERATION

Conference Organizers: Donald Henderson, Ph.D., Richard Salvi, Ph.D., Francesco Fiorino, M.D. and Vittorio Colletti, M.D.

The purpose of this project was to organize an international symposium to synthesize and review the findings and issues related to: (1) Auditory system neural plasticity and reorganization (2) Hair cell regeneration and (3) Acquired resistance to noise or drug induced hearing loss. To achieve these goals, a three day International Symposium was held May 5-7, 1994 in Terme di Comano, a secluded conference center just outside of Trento, Italy. The organizers invited 29 well known scientists and clinicians from around the world to present their most recent scientific findings, participate in the discussions and synthesize what was known about each of the topics outlined above. Each one day session began with a general discussion of each scientific phenomenon and ended with a review of the clinical significance of the results. The conference also included a precis poster session to allow other scientists and clinicians with an interest in these topics to present their results and participate in the scientific and clinical discussions. Approximately 110 individuals attended the three day conference.

A second important goal of the meeting was to publish the proceedings of the conference as soon as possible so that the material could be disseminated to other scientists, clinicians and students who were unable to attend the conference. Each speaker was asked to submit a comprehensive review paper describing key aspects of their results as well as other relevant findings in the literature. All of the summary papers were carefully reviewed by the editors, modified and sent to the publisher, Thieme Medical Publishers, within 6 months after the end of the conference. The book entitled "Auditory Plasticity & Regeneration: Scientific and Clinical Implications" is currently in production and is scheduled to appear in print in the Fall of 1995. The book is estimated to be approximately 500 pages in length. The Title Page and Table of Contents of the book are attached. When published, the U.S. Army Medical Research Agency will be sent six copies.

TABLE OF CONTENTS

HAIR CELL AND SUPPORT CELL REGENERATION

CHAPTER 1:

Retinoic Acid: A Primary Morphogen that Affects Both the Differentiation and Regeneration of Mammalian Auditory Hair Cells

PHILIPPE P. LEFEBVRE, DOROTHY A. FRENZ, HINRICH STAECKER, JUAN REPRESA, BRIGITTE MALGRANGE, ROBERT J. RUBEN, GUSTAVE MOONEN AND THOMAS R. VAN DE WATER

CHAPTER 2

In Vitro Analysis of Hair Cell Regeneration in the Avian Inner Ear

TERANCE T. TSUE, ELIZABETH C. OESTERLE, EDWIN W. RUBEL

CHAPTER 3

Trauma, Repair and Regeneration: The Role of Supporting Cells

YEHOASH RAPHAEL, HENRY J. ADLER, ANDREW J. NIEMIEC AND RICHARD A. ALTSCHULER

CHAPTER 4

Correlation of Hair Cell Regeneration with Physiology and Psychophysics in Adult Chickens Following Acoustic Trauma LIN CHEN, PATRICIA TRAUTWEIN, MARLENE SHERO AND RICHARD SALVI

CHAPTER 5

Recent Observations on the Recovery of Structure and Function in the Sound Damaged Chick Ear

JAMES C. SAUNDERS, DARYL E. DOAN, YALE E. COHEN, HENRY J. ADLER AND CHRISTIAN P. POJE

CHAPTER 6

Changes in Innervation and Auditory Sensitivity Following Acoustic Trauma and Hair Cell Regeneration in Birds
BRENDA M. RYALS AND ROBERT J. DOOLING

CHAPTER 7

Repair of Inner Hair Cell-Auditory Nerve Synapses and Recovery of Function After an Excitotoxic Injury RÉMY PUJOL, CHRISTINE GERVAIS D'ALDIN, SAAID SAFFIEDINE, MICHEL EYBALIN AND JEAN-LUC PUEL

CHAPTER 8

Potassium Channel Gene Expression and its Potential Role in the Mouse Auditory System

BRUCE L. TEMPEL, JOHN J. GRIGG, HAO WANG AND MARGARET L. ALLEN

"TOUGHENING" OF THE AUDITORY SYSTEM

CHAPTER 9

The Effects of Sound Conditioning on the Cochlea BARBARA CANLON

CHAPTER 10

"Toughening" of the Mammalian Auditory System: Spectral, Temporal and Intensity Effects MALINI SUBRAMANIAM, DONALD HENDERSON AND LYNN HENSELMAN

CHAPTER 11

Biological Mechanisms of the "Toughening" Phenomenon

DONALD HENDERSON, MALINI SUBRAMANIAM, VLASTA SPONGR AND
GIUSEPPE ATTANASIO

CHAPTER 12

Role of the Middle Ear Muscles in Acoustic Conditioning: Physiological and Molecular Studies

ALLEN F. RYAN, LIN LUO, RICK LIEBER, NIGEL K. WOOLF AND G. ALF AXELSSON

CHAPTER 13

The Effects of Primed and Interrupted Impact Noise Exposures on Hearing Loss in the Chinchilla

MICHELE ROBERTO, ROGER P. HAMERNIK, WILLIAM A. AHROON AND CHRISTOPHER J. CASE

CHAPTER 14

Development of Active Resistance to Noise-Induced Hearing Loss FRANCESCO G. FIORINO, V. SITTONI, T. INDELICATO AND VITTORIO COLLETTI CHAPTER 15

Resistance of Regenerated Hair Cells to Aminoglycoside Toxicity

ERI HASHINO

CHAPTER 16

Protective Mechanisms in the Cochlea: Heat Shock Proteins
RICHARD A. ALTSCHULER, HYUN HO LIM, JOHN DITTO, DAVID
DOLAN & YEHOASH RAPHAEL

CENTRAL NERVOUS SYSTEM REORGANIZATION AFTER COCHLEAR DAMAGE

CHAPTER 17

Plasticity of Sensory Representations in the Auditory and Other Systems of Adult Mammals

JON H. KAAS

CHAPTER 18

Features of, and Boundary Conditions for Lesion-Induced Reorganization of Adult Auditory Cortical Maps
RAMESH RAJAN AND DEXTER R.F. IRVINE

CHAPTER 19

Reorganiztion of Frequency Maps in Chinchilla Auditory Midbrain After Long-term Basal Cochlear Lesions Induced at Birth

ROBERT V. HARRISON, DANYAL IBRAHIM, SUSAN G. STANTON AND RICHARD J. MOUNT

CHAPTER 20

Anatomical and Physiological Changes in the Brainstem Induced at Neonatal Ablation of the Cochlea

LEONARD KITZES

CHAPTER 21

Rapid Functional Reorganization in the Inferior Colliculus and Cochlear Nucleus After Acute Cochlear Damage
RICHARD J. SALVI, JIAN WANG AND NICHOLAS POWERS

CHAPTER 22

Auditory System Plasticity in the Adult C57BL/6J Mouse JAMES F. WILLOTT

CHAPTER 23

Alterations in the Tonotopic Map of the Cochlear Nucleus Following Cochlear Damage

JAMES A. KALTENBACH, ROBERT J. MELECA AND PAMELA R. FALZARANO

CHAPTER 24

Intracellular Mechanisms Involved in the Afferent Regulation of Neurons in the Avian Cochlear Nucleus
EDWARD A. LACHICA, LANCE ZIRPEL AND EDWIN W. RUBEL

CHAPTER 25

Gaze-Evoked Tinnitus Following Unilateral Peripheral Auditory Deafferentation: A Case for Anomalous Cross-Modal Plasticity ANTHONY T. CACASE, THOMAS J. LOVELY, STEVEN M. PARNES, DUNCAN F. WINTER AND DENNIS J. McFARLAND

CHAPTER 26

Auditory Pathway Reorganization in Humans with Congenital or Acquired Unilateral Hearing Loss
J.-P. VASAMA AND J.P. MĀKELĀ

CLINICAL IMPLICATIONS OF PLASTICITY

CHAPTER 27

Immediate and Delayed Changes in Auditory Performance with Microvascular Decompression of the Cochlear Nerve
VITTORIO COLLETTI AND FRANCO G. FIORINO

CHAPTER 28

Consequences of Deafness and Electrical Stimulation on the Auditory System

JOSEF M. MILLER, RICHARD A. ALTSCHULER, JEROME DUPONT, MARCI LESPERANCE AND DEBARA TUCCI

CHAPTER 29

Auditory Repair, Regeneration, Toughening and Plasticity: A Clinical Perspective
ROBERT J. RUBEN
